Re: Christopher Busby

Bremen, April 12, 2014

Dear Mr. Lantz,

Thank you for your recent request regarding the role of Christopher Busby at our University. Immediately after I had received your letter, I collected the information from my colleagues with whom Mr. Busby allegedly cooperated. It turned out that despite a formal request by him and approval from our side to have him as a visiting scientist at our institution for a short time, he never showed up and did not cooperate with us at all. Instead he had published a paper with our affiliation (<http://www.scirp.org/journal/PaperDownload.aspx?paperID=40157>) which was submitted even after his "cooperation" had ended. I informed the editor of the journal, and meanwhile the affiliation was changed to "Green Audit" as can be seen in the pdf.

In addition I have informed "Research Gate" about the misuse of our affiliation by Christopher Busby. Meanwhile, that has been corrected, too, and Mr. Busby does not show up any longer in this website with us as his affiliation. Instead, Mr. Busby's affiliation appears as "University of Ulster - Centre for Molecular Biosciences". Whether this is the case I can't say, at least I couldn't find him using the search function of the BMSRI website.

Please don't hesitate to contact me if you have further questions.

Sincerely,

(Prof. Dr. Alexander Lerchl)
